

GROUND BREAKING

Z55 COMPACT EXCAVATOR

TRUE ZERO-TAIL-SWING • Zero-tail

design ensures that the upper structure never overhangs the tracks, increasing productivity in tight spaces.

ANGLE BLADE WITH FLOAT • The dozer blade can be angled 25° in either direction to eliminate repetitive repositioning when backfilling.

POWER-A-TACH® • With the flip of a switch, attachments can be changed quickly with minimal effort. The operator only leaves the seat to engage and disengage the safety pin.

DIGITAL OPERATOR INTERFACE • Located in a highly-visible area and backlit for improved visibility, this interface features an hour meter, clock, automatic adjustable reminders, regeneration notifications, historical monitoring and fuel consumption.
