CHAIN DRIVE AUGERS

EDGE® CHAIN DRIVE AUGERS

Choosing the right auger attachment requires experience, the EDGE attachments team can help you determine the correct auger drive for your machine and application. Factors to consider are: soil condition, hole width and depth and hydraulic power of your machine. EDGE experts will provide you with the correct mounting plate, hydraulic powered auger drive unit, auger drilling bit and specialized wear parts for your job.

OPERATIONAL BASICS

The EDGE chain reduction drive units are designed for medium to heavy-duty applications and are a popular alternative to the planetary drive augers. Chain drive augers feature pre-stressed, fully adjustable reduction drives and the strongest connecting links available. Choose auger drive units and bits in 2-9/16" Round or 2" Hex output shafts. Complete units include the universal skid steer mount, top link, hoses, and flat-faced couplers. All auger bits are sold separately.
